More Info and latest Phones that support eSIM and explanations:

Apple iPhones:

Apple's [iPhone XS, XS Max, XR, 11, 11 Pro and 11 Pro Max](#) all have an eSIM, in addition to the standard plastic SIM card

Google Pixel:

[Google's Pixel 2, 3, 3A and 4](#) also have a standard SIM card slot and eSIM support.

Google Pixel 5 (Yet to be released, probably on, before or around October 2020)

Samsung Galaxy:

[Samsung's Galaxy Fold](#) has an [eSIM and a Micro-SIM card tray](#)

Samsung's [Galaxy S20, S20 Plus and S20 Ultra](#) have a [standard SIM and an eSIM](#), as does [the Galaxy Z Flip](#).

Motorola:

The [Motorola Razi](#) is the first phone to launch without a physical SIM card slot, relying solely on eSIM.

Sony:

Sony Xperia 1R/2 SIM - Hybrid Dual SIM (Nano-SIM, dual stand-by) - 2020, February 24

One Plus:

OnePlus 8/8T SIM - Dual SIM (Nano-SIM, dual stand-by) (Not Yet released)

eSIM capability Smartphones (Hybrid Dual SIM or Dual stand-by SIM):

Most Smartphones/Devices and/or its model not listed here may still support eSIM in addition to having a Nano-SIM slot, especially phones that are manufacture red from other brands in the last quarter of 2019 and in early 2020. If the Smartphone indicates a Hybrid SIM (Nano-SIM and Dual stand-by), it may or may not support eSIM. However, the best is to

contact the phone manufacturers support team to know if your current phone model/
brand supports eSIM
